PROJECTS

NYUMBANGIN

NEXT.JS, NODE.JS, MONGODB, SOCKET.IO

A full-stack digital donation web application designed for content creators. It features real-time donation notifications tailored for live streaming using Socket.io, a REST API for OAuth 2.0 authentication and donation management, dedicated dashboards for both admins and creators, and robust database management using MongoDB.

DISHY

NEXT.JS, NODE.JS

A modern, highly responsive landing page website developed for a local band with a strong focus on user experience. This project features interactive navigation, a hero slider, and an image gallery, all optimized to ensure high performance and consistent visual design across various screen sizes.

TAKOTYPE

REACT.JS, EXPRESS.JS

An interactive typing practice web application that provides real-time user performance statistics. Built with a responsive desktop interface using React.js, it efficiently manages complex application states to calculate and display Words Per Minute (WPM) in real-time.
